CITIZENS FOR NUCLEAR ENERGY

Nuclear energy is one of the cleanest, most abundant sources of electricity in America. And that makes nuclear energy very popular among citizens from all walks of life.

Nuclear electric plants generate electricity cleanly, without polluting the atmosphere.

In fact, nuclear energy helps reduce airborne pollutants in the U.S. by over 19,000 tons every day.

And because nuclear electric plants don't emit carbon dioxide, they don't add to the greenhouse effect, potential global warming and its adverse effect on the environment and our quality of life.

America's 112 nuclear electric plants are our second largest source of electricity. But they won't meet the demands of a growing population and economy. We need more plants.

For more complete information about nuclear energy, write to the U.S. Council for Energy Awareness, P.O. Box 66080, Dept. CI12, Washington, D.C. 20035.

CELICA

THE CONVERTIBLE ACCORDING TO ISIAH.

Whether he's going up for a slam dunk or down the road for a drive, Isiah Thomas likes to get a lot of air. And when it comes to driving, there's no better way than in the new 1991 Celica Convertible.

Toyota hasn't just opened up a car with the Celica Convertible, they've opened up the road. Because Celica's twin-cam 16-valve engine delivers the same kind of performance Isiah is known for—high powered.

The Celica Convertible doesn't only make what's on the outside look great. Inside, the ergonomically designed interior fits like it has been molded around you and comes complete with a driver-side air bag Supplemental Restraint System (SRS)* and a Deluxe AM/FM stereo radio with four speakers.

The Toyota Celica Convertible. It's chapter and verse of what convertibles are all about—according to Isiah.

"I love what you do for me."

*The 1991 Celica Convertible features a driver-side air bag Supplemental Restraint System (SRS) which activates in a front-end accident of enough magnitude to inflate the bag. In a moderate collision, primary protection is provided by the three-point lap and shoulder belt system, and the air bag may not inflate. So, safety belts should be worn at all times by all occupants. Get More From Life...Buckle Up! © 1990 Toyota Motor Sales, U.S.A., Inc.
